ANCHOR DIAGNOSTICS

Minimize Complexity, Maximize Productivity

Made in Germany

At ANCHOR Diagnostics, we transform diagnostic workflows with solutions that combine reliability, simplicity, and speed – empowering laboratories to achieve remarkable efficiency and improve patient outcomes. With rapid turnaround times, our infectious disease solutions provide unmatched flexibility, enabling laboratories to efficiently process patient samples, regardless of when they arrive during the day.

Why ANCHOR Diagnostics?

Time to Result
Fast and accurate PCR results in just 30 minutes

Workflow Flexibility
Process incoming samples at any time, streamline diagnostic workflow and optimize resource management

Easy Handling
Intuitive, simple pipetting schemes and harmonized PCR temperature profiles

Device Compatibility
Combination with a broad range of NA extraction and PCR devices

High-Speed Diagnostics, High-Quality Results

DIAGNOSTICS

All ANCHOR PCR Kits are designed for straightforward and user-friendly integration into your diagnostic workflows. With intuitive pipetting schemes and harmonized PCR temperature profiles, multiple kits can be seamlessly combined in a single PCR run.

PCR Master A and B
contain all components required for target detection

Internal Control
allows monitoring of the entire workflow

Positive Control / Quantitation Standards
to monitor correct PCR / to allow quantitation of the target

Negative Control
to exclude false positive results
